Chronograph

“

With a busy lifestyle, it is really about making time for the things that are important to you. I've always been in the business of transformation — but that has always been for commercial businesses. Being a part of Operation Smile enables me to help transform the life of a child and that brings me great joy. I always thought cleft lips and palates were a cosmetic problem but it's more than that. The child can't eat or drink properly, causing malnutrition which leads to dire consequences. If a two-hour operation can help this child, that to me is truly rewarding.”
